

HD-TECH can now supply full range of FAKRA connectors and FAKRA cable assemblies for most of our antennas and panel integration. FAKRA connectors are utilized within the automotive industry. Standard uses for FAKRA are coaxial connections on devices with external antennas. Such applications include SDARS, Cellular, GPS Navigation, key-less entry and AM/FM radio.

Based on the standard SMB interface, FAKRA connector provides a mechanical key feature along with a visual color code to differentiate between applications :

Type A : Radio with feed tension
Type B : Radio without feed tension
Type C : GPS telemetry or navigation
Type D : Cellular phone
Type E : TV1 and WiFi

Type F : TV2
Type G : Remote control keyless entry
Type H : Radio Controlled Parking Heating
Type K : Radio with IF output
Type L, M, N : not defined

HD-TECH offers FAKRA connectors with a high temperature plastic shroud that is fully compatible with lead-free reflow processes. We also have a robust Diecast FAKRA that exceeds all USCAR specifications.
